ABSTRACT

This report is a photographic study of this ground force installation and provides the following data:

A. Delineation of installation - boundaries.
B. Identification of functional areas.
C. Measurements of all buildings within the installation.

INTRODUCTION

The following alphabetical designators are used to identify functional areas within military installations.

A. Billeting area
B. Vehicle storage/maintenance area
C. General storage area
D. Ammunition storage area
E. Miscellaneous areas (hospitals, prisons, POL, personnel training facilities)
F. Small-arms range
G. Driver-training area
H. Support area
J. Tank/assault-gun range
K. Automatic weapons range
L. Subcaliber range
M. APC range
N. Combined-arms range
P. Antiaircraft artillery site
Q. Infantry training area
R. Special or unidentified area

The absence of one or more alphabetical designators indicates that those functional areas were not observed at that particular installation.

The lower case letters (e.g., Ba) are used to identify more than one area of a particular functional category.

This report has been published as an interim Basic Imagery Interpretation Report with concurrence of the Defense Intelligence Agency.
